RE: William Dick Lagoons Site

Dear Mr. Kelly:

In response to EPA's letter of July 20, 1987, this will advise you that Chemical Leaman Tank Lines, Inc. (Chemical Leaman) is interested in exploring the possibility of conducting or participating in the financing of a Remedial Investigation/Feasibility Study (RI/FS) at the above site.

While this expression of interest is not to be interpreted as either an admission of liability with respect to any conditions at the site or a binding commitment to undertake or pay for the RI/FS or any other response action at the site, Chemical Leaman is willing to enter into negotiations with EPA and any other potentially responsible party in an effort to arrive at an agreement concerning the RI/FS. We believe, therefore, that the conditions specified in your letter have been met, and, accordingly, that EPA may send a special notice letter under §122(e) of SARA. We request that this letter include the information specified in §122(e)(1) of SARA.

Chemical Leaman is not currently involved in any discussions with State or Local authorities, engaged in voluntary action, or involved in any lawsuit regarding this site.

AR300003

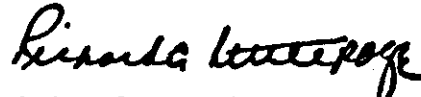

Mr. Jack Kelly (3HW12)

U.S. Environmental Protection Agency
